

New Senior Living Community Coming to Howard  
**The Lighthouse of Howard** will offer a choice of senior living options devoted to Living Life on Purpose®.

West Bend, WI – Evidence Development Companies has land under control and is moving forward with the development of a 90 unit senior living community. The new community will be called the Lighthouse of Howard and will be managed by the Eden Prairie, MN based New Perspective Senior Living.

The Lighthouse of Howard will be located at the new Village Center in the Village of Howard, and will include a variety of apartment choices along with lifestyle and care options to serve independent, assisted and memory care residents.

“We couldn’t be happier to bring a new senior living community to the Village of Howard. The “Lighthouse” communities in Minnesota, Wisconsin, and Illinois are known for creating environments where seniors can Live Life On Purpose®.” Said Nicholas Novaczyk President/CEO of Evidence Development Companies.

Howard President Burt McIntyre said the senior living facility will serve as the cornerstone to a long-awaited and much anticipated Village Center development in the community.

“The Lighthouse of Howard will fit in well with the area that is planned to be a bustling, full-service part of our community,” McIntyre said.

The 120,000-square-foot community will feature restaurant-style dining, salon, library, computer room, fitness area, warm water therapy pool, pub, bistro, community rooms, private family dining spaces and a number of outdoor patio spaces.

“We are an important resource in all the locations where we open Lighthouse Communities, and we appreciate the opportunity to work with Evidence Development Companies to provide the same value to the seniors of Howard,” said New Perspective CEO, Todd Novaczyk. “Our 4 Pillars philosophy for Living Life on Purpose® integrates Brain Fitness, Physical Fitness, Dining Experience, and Social/Spiritual Engagement to help our residents discover, create, and sustain a meaningful lifestyle for successful aging.”

The 15 million dollar construction project is expected to hire 70-80 construction workers during the project. Upon completion and lease up, the Lighthouse is initially expected to create about 65 jobs.
